Choose the most cost-effective interview strategy

**InterviewFriend is RS234
cheaper per interview**

Optimistic Scenario (1200 users)

Cost Type	MyreGPT	InterviewFriend
Fixed Cost	₹10,00,000	₹0
Campaign Cost	₹7,00,000	₹7,00,000
Variable Cost	₹0	₹7,20,000
Total Cost	₹17,00,000	₹14,20,000
Cost per User	₹1417	₹1183

**InterviewFriend is RS500
cheaper per interview**

Normal Scenario (800 users)

Cost Type	MyreGPT	InterviewFriend
Fixed Cost	₹10,00,000	₹0
Campaign Cost	₹7,00,000	₹7,00,000
Variable Cost	₹0	₹6,00,000
Total Cost	₹17,00,000	₹13,00,000
Cost per User	₹2125	₹1625

**InterviewFriend is RS3350
cheaper per interview**

Pessimistic Scenario (400 users)

Cost Type	MyreGPT	InterviewFriend
Fixed Cost	₹10,00,000	₹0
Campaign Cost	₹7,00,000	₹0
Variable Cost	₹0	₹3,60,000
Total Cost	₹17,00,000	₹3,60,000
Unit Cost	₹4250	₹900

myregpt vs. Interview Friend

What are the risks of myregpt?

High idle capacity risk and cost-effectiveness only with >1667 users. Otherwise, sunk costs and wastage.

What are the benefits of Interview Friend?

Variable costs, no wastage, better cost control, and ideal for fluctuating user volumes.

- **Recommendation: Choose Interview Friend for financial safety and flexibility**
- **MyreGPT is viable only if: Usage >1667 interviews and activation >80% (not supported by current data)**

Sensitivity Analysis

Price	Mycu	GPT	Interview Friend
400	4250	900	Int
600	2833	900	Int
800	2125	1625	Int
1200	1700	1450	Int
1400	1214	1100	Int
1600	1062	1038	Int
1800	944	988	Mycu
2000	850	1050	GPT

Myregpt is Cost efficient at 1667 User as per user cost becomes equal to interviewfriends cost which is 1019

For MyreGPT to be viable, they must secure 1667+ users to match Interview Friend's per-interview cost. This needs aggressive user acquisition and reduced campaign costs from ₹7L to be feasible.

Mycu GPT Inefficiency Funnel

USER ENGAGEMENT PLAN

Using an informal, friendly tone helps grab attention and makes users feel at ease—especially those anxious about interviews. A conversational style feels more personal and supportive, reducing pressure and building trust. Here's a WhatsApp and email flow designed with that in mind.

Whatsapp Flow

✉ DAY 10

Email 3: Final Push

Subject: ⌚ Final call: Your mock interview expires tonight

Hey [Name],

This is it — your last shot to take the free mock interview before it disappears.

No prep, no pressure — just real questions, AI feedback, and a major confidence boost.

Don't ghost this opportunity 👁️

👉 Book now: [Link]

CONCLUSION

InterviewFriend is more cost-effective across all engagement scenarios due to its pay-per-use model and absence of fixed costs. It offers better financial flexibility, especially when user participation is uncertain. In contrast, MyreGPT, with a high Idle capacity risk, becomes inefficient at low user engagement levels due to unused capacity. Unless user turnout is guaranteed to be high, InterviewFriend minimizes financial risk and ensures better cost efficiency.

Thus company should opt for InterviewFriend. Its pay-per-use model ensures that costs scale directly with actual usage, offering better cost-efficiency in all engagement scenarios—from pessimistic to optimistic.
